Dear Ladies and Gentlemen,
dear Colleagues and Friends of Neural Therapy,

As president of the Austrian Society for Neural Therapy I am very pleased to announce that our next International Forum Neural Therapy will take place from 4 to 6 October 2024 in Vienna, Austria.

It will be the first forum to be held in cooperation with the Society for Functional Myodiagnosics. The main topic will be

“Methods to Explore and Treat Unspecific Conditions”.

As usual we will invite internationally recognized neural therapists and scientists of expertise to examine the vast field of regulation and regulatory medicine with us.

In addition to science we will of course not disregard art, culture, and culinary delights. As the forum will be held near Schönbrunn Palace, we will organize a guided tour of this UNESCO World Heritage.

Vienna is rightfully known as one of the most popular congress cities. Its excellent public transportation invites you to enjoy the city's rich cultural heritage and wonderful ambience.

The “Österreichische Medizinische Gesellschaft für Neuraltherapie und Regulationsforschung“ is looking forward to welcoming you to Vienna as participant of the International Forum Neural Therapy in October 2024.

With cordial greetings on behalf of the organizing committee.

Regina Stemberger M.D.
President of NT Austria
